Informe Sustantivo de Misión Oficial en el Exterior

Nombre del funcionario (a) Celisa Elizabeth López Martínez Cédula: 8-443.454

Cargo: Analista Internacional No Plan 01 N° Posic. 4301

Fecha de la Misión: 23 al 27 de abril 2018 Desde: 23 de abril 2018 Hasta: 27 de abril 2018

País: Tokio- Osaka Japón

Misión Oficial: Planificación para Ciudades Seguras, Inclusivas y Resilientes

INFORMACIÓN SUSTANTIVA

1. Objetivo:	<ul style="list-style-type: none">○ Desarrollar una comprensión más profunda del enfoque holístico requerido para planificar ciudades seguras, inclusivas y resilientes.○ Mejorar la inclusión social y la seguridad mediante la inversión en servicios e infraestructura urbanas.○ Involucrar a los ciudadanos y generar confianza en las autoridades locales a través de enfoques y herramientas participativas○ Garantizar la inclusión económica mediante la conexión de barrios rezagados, con empleos.
2. Resultados (Valor Agregado en el desempeño de su cargo)	<p>Durante las sesiones cada delegación preparó una presentación breve donde pudimos</p> <ul style="list-style-type: none">♣ ¿Cuáles son los principales desafíos que la ciudad de Panamá está tratando de resolver?♣ ¿Cuáles son las variables específicas que la ciudad intentan abordar?♣ ¿Qué cambiará una vez que se aborde el desafío? <p>Fue importante notar que esta oportunidad de compartir con los compañeros las lecciones de nuestra ciudad, aprendimos también del proceso de resolver desafíos de experiencias compartidas de otras ciudades.</p>

El último día de la sesión cada país presentó un plan de acción, del cual el pasado viernes 27 de julio de 2018, se sostuvo una reunión con el Señor Haris Sanahuja, para darle seguimiento a su posible implementación. (Ver plan de acción adjunto a este informe)

3. Impacto en las funciones bajo su responsabilidad, será a:	Corto Plazo ____ Mediano Plazo ____ Largo Plazo ____

Technical Deep Dive on Planning Safe, Inclusive and Resilient Cities

April 23-27, 2018

Tokyo and Osaka, Japan

Executive Summary

While urbanization is moving the global economy forward, rising inequality and exclusion within cities can derail development progress. Rapid urbanization has not kept up with the increasing demands for jobs, housing, infrastructure and services. Spatial challenges such as unplanned and haphazard urbanization lead to unsustainable city forms, inadequate urban services, proliferating informal settlements, and vulnerability to disasters due to unsafe locations. Social challenges include exclusion, social tensions between migrants or displaced and host communities, increased risks of crime and violence, and issues of voice, rights and participation. There are also economic challenges, such as unemployment and informal jobs with uncertain income sources and unsafe working conditions. Today, city-leaders are grappling with the challenges of how to make their cities more safe, inclusive and resilient.

Resilience is increasingly recognized as a key attribute of an effective urban system. Within many quarters, there is a tendency to focus discussions of resiliency on resilience to natural disasters. However, cities face a range of other shocks and stresses, such as economic downturns, conflicts, crime and violence, and social exclusion. These shocks can have devastating effects, bringing all or parts of an urban system to a halt and causing asset damage as well as loss of life. Acute shocks and chronic stresses can also have a deep and lasting effect on human development, impacting economic prosperity, competitiveness, livelihoods and well-being.

To make sure that today's and tomorrow's cities provide opportunities and better living conditions for all, the key is to understand the interlinked spatial, social and economic factors that affect development and resilience of these cities in a holistic manner. The spatial dimension of inclusion cannot be separated from economic and social dimensions since it is usually socially and economically marginalized groups that inhabit physically deprived spaces. The TDD will provide an opportunity for knowledge exchange and structured learning that will shed light on tools and approaches that lead to integrated urban planning, combining physical investments with better social and economic outcomes, particularly with respect to inclusion.

Participants will include practitioners and decision-makers (including city Chief Resilience Officers) from developing countries, World Bank Task Team Leaders (TTLs) or senior project team members, and experts from Japan, who will showcase approaches and experiences related to integrated urban planning.

FOCUS

This TDD will provide an opportunity for selected city delegations to develop a deeper understanding of the holistic approach required to plan safe, inclusive and resilient cities. The TDD will focus on following topics:

- i. Enhancing social inclusion and safety through investing in urban services and infrastructure;
- ii. Engaging citizens and building trust in local authorities through participatory approaches and tools;
- iii. Ensuring economic inclusion through connecting lagging neighborhoods to jobs.

Through presentations, discussions, and site visits, the TDD will look at how various cities have planned for infrastructure, services and amenities to promote safe, inclusive and resilient development.

Organizer and Partners

The program is being organized, in Japan, by the **Tokyo Development Learning Center (TDLC)** which supports and facilitates strategic WBG and client country collaboration with select Japanese cities, agencies and partners for joint research, knowledge exchange, capacity building and other activities that develop opportunities to link Japanese and global expertise with specific project-level engagements in developing countries to maximize development impact. On the technical side, the program will be developed in collaboration with the World Bank's community of practice on Safe and Resilient Cities and the Rockefeller Foundation's 100 Resilient Cities Network.

Delegations from 10-12 cities will be invited to participate. Preference will be given to cities that are members of the 100 Resilient Cities Network. Delegations will consist of: 1 TTL from the World Bank's Urban Practice, 1 TTL from the World Bank's Social Practice, and 2-3 client representatives, 1 of which will be the city's Chief Resilience Officer.

Format

The program will integrate workshops, site visits, peer-peer knowledge sharing and action planning. Delegates to the Technical Deep Dive will benefit from:

- Cutting-edge policy thinking and technical knowledge delivered through engaging learning sessions;
- Increased capacity to assess policy and regulatory frameworks across several sectors;
- Peer learning and networking through experience exchange sessions;
- Experimental knowledge exchanges through site visits;
- Opportunity to engage directly with Japanese and Korean municipalities, ministries, , private sector and academia, to learn innovative solutions and to identify areas of further collaboration and knowledge exchange;
- Access to follow-up operational support to assist in the successful application of knowledge gained through the TDD, provided through TDLC's operational support component.

DAY 1		Monday, April 23rd, 2018 in Tokyo (TDLC)
SCHEDULE		
8:15-9:00	Breakfast and Registration at Tokyo Development Learning Center (TDLC), Tokyo, Japan	
9:00-9:35	Welcome and technical deep dive objectives <i>Facilitator: Dan Levine, Senior Officer, TDLC, GSURR, WBG</i> Welcome Remarks <i>Phil Karp, Lead KM Specialist, GSURR, WBG</i> <i>Lauren Sorkin, Regional Director, City & Practice Management, 100 Resilient Cities</i> Introduction to TDD Program <i>Phil Karp, Lead KM Specialist, GSURR, WBG</i> Icebreaker –Cultural Bingo <i>Haruka Imoto, KM Analyst, TDLC, GSURR, WBG</i>
